FOR IMMEDIATE RELEASE:

James Thompson, Daniel E. Coslett—Winners of the International Award for Excellence for *The International Journal of the Constructed Environment*, Volume 8

Champaign, Ill., USA – 30 March 2018 – The Constructed Environment Research Network is pleased to announce the selection of “A Pre-disciplinary Approach to Built Environments Education: Teaching Seattle on Foot,” James Thompson, Daniel E. Coslett, as the winners of the International Award for Excellence for Volume 8 of *The International Journal of the Constructed Environment*. This article was selected for the award from among the highest-ranked articles emerging from the peer-review process and according to the selection criteria outlined in the peer-review guidelines.

About *The International Journal of the Constructed Environment*:

The International Journal of the Constructed Environment publishes broad-ranging and interdisciplinary articles on human configurations of the environment and the interactions between the constructed, social, and natural environments. The journal brings together researchers, teachers, and practitioners. Established in 2011, *The International Journal of the Constructed Environment* is indexed by Art Source (EBSCO), China National Knowledge Infrastructure (CNKI Scholar), EBSCO Polytechnic Studies Collection: India, Environment Complete (EBSCO), Environment Index (EBSCO), and The Australian Research Council (ERA). The journal offers both personal and institutional subscriptions and is published electronically and in print. For more information, please visit <http://constructedenvironment.com/journal>.

About Common Ground Research Networks:

The International Journal of the Constructed Environment is among the sixty-six scholarly journals published by Common Ground Research Networks. Common Ground, which was founded in 1984, seeks to take the pivotal ideas and challenges at play within established disciplines and create spaces for interaction that cut horizontally across legacy knowledge structures. As a result, in addition to providing a space for publication within its catalog of journals and their associated book imprints, Common Ground encourages researchers and practitioners to meet at the annual academic conferences that it organizes around the world and then connect and share their work virtually using Scholar, Common Ground’s innovative social knowledge software. For more information, please visit <http://cgnetworks.org>.
