Healthcare fraud is a global problem, and has been an issue for as long as healthcare has existed. It is not a new problem, but one that continues to grow in frequency and complexity.

In the UK, the National Health Service (NHS) is the largest single payer of healthcare in the world. It is estimated that up to 5% of all healthcare spending in the NHS is fraudulent, and this figure is likely to rise as technology and communication methods evolve.

The impact of healthcare fraud across the NHS

Dr Martin Teasley, Senior Lecturer in Counter Fraud Studies at the University of Portsmouth's Institute of Criminal Justice Studies outlines how healthcare fraud can be detrimental to the NHS.
